Exercise:

You are given 6 user stories for your project, please assign those stories within your scrum team.

Please make 5-minute video and describe:

- ☐ Name of the team?
- ☐ Name of the project?
- ☐ How long was the sprint?
- ☐ While describing your task please specify:
Your user story and how many points it was:

If (bug==true) {

1. Describe your bug priority vs severity
2. Which details you specified when you logged a bug and where you logged it
3. Describe bug life cycle

}else {

1. What types of testing techniques you used while testing your user story? (Positive, Negative, Boundary Value Analysis etc..)
2. What types of testing types can you implement to test your user story?(Smoke, Regression, Sanity etc...)
3. STLC (Name the sequence of STLC phases)

}
