Guardian Life Insurance Co. of America

Appleton, WI

The Guardian Life Insurance Company of America is the fourth largest mutual life insurance company in the United States. Guardian and its subsidiaries protect individuals, businesses and their employees with life, disability, health and dental insurance products, and offer 401(k), financial products and trust services.

Project Description:

As a tester I worked on the Unified client view application. The Unified Client View shows insurance agents all the financial services products that individual customers have purchased from Guardian. Using a Web browser, insurance agents can search for information on a customer-by-customer basis and find all the information about individual customers on an integrated set of screens displays. They can enter a single query and quickly determine what insurance and financial services products various customers are purchasing from Guardian

Liberty Mutual

Boston, MA

LMG offers a wide range of insurance products and services, including Personal automobile, homeowners, workers compensation, commercial automobile etc.

Project Description:

I worked as a Quality Analyst on Liberty Mutual Website, which offers real-time quotes on auto, Renter's and life insurance from various companies. Worked on "Get a Quote" application and in that it had three sub modules for quoting on life, home or renter's insurance and automobile insurance. The site allowed users to set up their login and password, which helped them to get quotes, and buy insurance policies online.

Geico

Chevy Chase, MD

Is the second largest auto insurance in America that provides different types of coverages from auto to renters, life, pet, umbrella, flood, homeowners and many more.

Project Description:

I worked as an Automation Engineer at Geico on a project called Umbrella. Umbrella is an additional coverage that auto users can add to their policy. Our application consists of 2 sites: sales and service. Once eligible user is able to purchase the policy then service site of the application was allowing to maintain and update policy details such as adding additional vehicle, drivers, watercrafts or rental properties. Also, there is 2 types of users can interact with the application: customers and counselors. So, my main responsibilities were to automate this umbrella application.
