Landmark Mortgage Corporation,   **Gretna,   LA**

Landmark Mortgage is a full-service mortgage lender offering responsive professional service to clients. They offer competitive rates, easy terms and flexible criteria that allow clients to obtain financing under almost any circumstances.

Project Description:

Online Mortgage Application: It is a web-based application through which the customer can fill in all the details pertaining to the mortgage. This included loan information, property information, borrower information, bank and investment information and realtor information. An appropriate decision was taken based on the applicant information. My duties included testing for the web page to ensure all elements of the page were working and data was transmitted appropriately.

Prudential Financial Inc.   **Newark, NJ**

Prudential Financial Inc. has companies which offer a variety of products and services, including life insurance, mutual funds, annuities, pension and retirement-related services and administration, asset management, banking and trust services, real estate brokerage franchises, relocation services and, through a joint venture, retail securities brokerage services.

Project Description:

Management Assets Consulting Services (MACS):   As a QA Analyst, I was in charge of conducting web-based and back end testing of Managed Assets Consulting Services (MACS), which offered consumers access to proven investments managers and analysts for larger personal assets. Test focus was on ensuring a stable, fast and accurate intranet between financial departments and open communication with online customers. Functionalities were checked with different system modules.

Goldman Sachs,   **NYC,NY**

Goldman Sachs is a leading global investment banking, security and investment management firm that provides a wide range of services worldwide to a substantial client base including corporations, financial institutions, government and high network individuals.

Project Description:

Goldman Sachs global leaders online network: Goldman Sachs came up with this User Interface for a web-based application with an intention to support the Institute of International Education (IIE) of which Goldman Sachs is a sponsor. My job was to perform web testing for this same application, which essentially consisted of three areas. The first one was for global members to manage profiles, stay connected and network with one another. Second was for Goldman Sachs employees for querying global member's information. And the third for IIE staff to manage member's information and run reports.

Merrill Lynch   **Hopewell, NJ**

Merrill Lynch is one of the leading financial management and advisory companies with offices in 35 countries and private client assets of approximately $1.5 trillion.

Project Description:

Worked as a Automation Tester on the Benefits Online Project. Benefits Online is a web-based application, which helps users manage their assets and funds. After a successful logon, user's home page would list all the account types they had their funds allocated to. They could transfer or withdraw funds using various combinations made available to help them manage their funds. User could also calculate the maximum loan amount he or she was eligible for and apply online. All the Customer Information was saved on Oracle databases. Reports are generated for internal and external use. The bank's general ledger is synchronized with that of the system.

Washington Mutual Bank   **Fairfax, VA**

Washington Mutual, Inc. is now established as one of the nation's leading financial services companies and continues to serve consumers and small to mid-sized businesses through the various subsidiaries in the Washington Mutual family of companies. Its other subsidiaries offer financial services such as asset management, trust, brokerage, and related annuity and mutual fund products.

Project Description:

The project at WaMu was upgrading Web based system that involved Online Mortgage Activity (OWM) which included application process, checking of application status, Mortgage rates, percentage calculator, tabular and graphical analyses of customer inputs and many other mortgage tools.

JP Morgan Chase.   **Wilmington, DE**

JPMorgan Chase & Co. (NYSE: JPM) is a leading global financial services firm with assets of $1.5 trillion and operations in more than 50 countries. The firm is a leader in investment banking, financial services for consumers, small business and commercial banking, financial transaction processing, asset management, and private equity

Project Description:

Offer Entry System (OES-OS) is a web-based application used by the Statement Team to create and maintain the offers that are sent out with the monthly statements. Offers are information about new brokerage and securities programs mailed out to the customers informing them about their eligibility for new securities and brokerage instruments

CITIBANK **West Orange,NJ**

Citibank's Credit Card services operate one of the popular credit card brands. They offer a variety of credit cards like business cards, student cards, rewards cards, etc.

Project Description:

I worked as a QA analyst on their credit card Application Module, Account Center, and also online Payments. The customer fills up the application module form and the information is stored in a secured database. The credit specialists to determine the credit rating of the applying customer access this information. The account center stores the customer's information including bank information. The customer can login in to view all statements, account balances, and I performed various application tests on other banking activities like Hedge funds, Real estates, Private Equity, Portfolio, brokerage, securities, and Loans. The online payment module accesses the bank information for the particular customer and the specified option deducts the amount from their bank account

Shearson Mortgage Inc. **Woodland Hills, CA**

Shearson Mortgage Inc. is a Direct Lender, combining proprietary technology and 15 years' experience in the mortgage industry to give clients a lower cost mortgage delivered with quality service and speed.

Project Description:

The project was to test a web interface that provided all kind of mortgage services to the customer from basics of Mortgage information all the way to the process of Pre-Qualify and Pre-Approval .The project would provide fully automated channel to which Cendant Mortgage Corporation could pass Internet-connected Borrowers from phone queues to apply for loans or research questions without tying up phone lines or loans consultants as well as servicing customers and members of Cendant's Partners including Financial Institutions, Affinity Groups and Real Estate organizations by providing mortgage - related content for their Web sites

TD Ameritrade Holding Corporation, **Omaha ,Nebraska**
